03 Crown Vic Code P0352
P0352 is a diagnostic trouble code (DTC) for "Ignition Coil B Primary/Secondary Circuit Malfunction". This can happen for multiple reasons and a mechanic needs to diagnose the specific cause for this code to be triggered in your situation. Our certified mobile mechanics can come to your home or office to perform the Check Engine Light diagnostic.

P0352 OBD-II Trouble Code: Ignition Coil B Primary ...
The coil driver circuit is monitored by the PCM for faults. If an open or a short is detected in the driver circuit for coil number 2, a P0352 may set. Also, depending on the vehicle, the PCM may also shut down the fuel injector to the cylinder also.

P0352 Ignition Coil B Primary/Secondary ... - OBD-Codes.com
P0352 FORD Description. The ignition system on the vehicle uses individual ignition coils for each cylinder. The Engine Control Module (ECM) controls each ignition coil operation. The ECM sends a ON/OFF signal to energize the ignition coil to create a spark at the spark plug when a spark is required at the cylinder.

P0352 Ford - OBDII Codes Engine Light Definitions ...
When the code P0352 is set in the Powertrain Computer, it means that the Powertrain Computer or PCM is not seeing the proper electrical signals from the ignition coil (s) during normal operation. This can be caused by problems on either the primary (computer) side or the secondary (spark plug boot, spark plug wire and/or spark plug itself) side.

P0352 - OBD-II Trouble Code - RepairPal.com
I'm getting misfire codes p0352, p0353p0355, p0356, p0357. Primary misfires. Also, a more expensive code reader also gets a low voltage code. My car will set these codes only in drive at stoplights and occasionally at lower rpm's. When the car misfires the battery light will sometimes click on and then turn off.

Misfire Codes P0352, P0353, P0355, P0356 and P0357
