Algebra Word Problems Worksheet with Answers

Every word problem has an unknown number. In this problem, it is the price of the blouse. Always let x represent the unknown number. That is, let x answer the question. Let x , then, be how much she spent for the blouse. The problem states that "This" -- that is, \$42 -- was \$14 less than two times x . Here is the equation:

Determine what you are asked to find. In many problems, what you are asked to find is presented in the last sentence. This is not always true, however, so you need to read the entire problem carefully. Write down what you need to find, or else underline it in the problem, so that you do not forget what your final answer means. In an algebra word problem, you will likely be asked to find a ...
