Arch definition is - a typically curved structural member spanning an opening and serving as a support (as for the wall or other weight above the opening). How to use arch in a sentence. Did You Know?

Arch | Definition of Arch by Merriam-Webster
An arch is a pure compression form. It can span a large area by resolving forces into compressive stresses, and thereby eliminating tensile stresses.This is sometimes denominated "arch action". As the forces in the arch are transferred to its base, the arch pushes outward at its base, denominated "thrust".
