The following are suggestions for speaker placement: Left and right front speakers Place the cube speakers in line with the horizontal center of the TV screen or higher Place the cube speakers 6 to 15 feet apart

## **Speaker placement - Bose**

Originally the 901's were to be setup mostly at ear level when seated. The setup for the past 30 years has been tied to these short stands, or hung from the ceiling far off axis. There is even a recommendation for matching pairs of floor and ceiling 901's in some manuals, something I'm sure a few die hards have tried.

speakers (marked on the back of each one) on the left and right sides of your room, as you face them. Exactly where you put them depends on the size and style of your room and where you think they sound best.

### **Bose 201 and 301 Series V Direct/Reflecting Speakers**

Well, I have a bit of experience with the Bose 901 original series (no such thing as series I, because nobody knew there would be a series II).. Anyway, your set-up is not even close to the correct placement. The recommended placement is about 12-18 inches out from the back wall and the speakers facing directly forward (no toe-in).
