Physics Chapter 5

Mr. Dychko. Here's a top-down view of the car going around the curve. There's a friction force directed towards the center of the radius of curvature of this turn and this turn has a radius r . And the car's going at 50 kilometers an hour, which we convert into meter per second; multiplying by 1 hour for every 3600 seconds.

#3 QUESTION: A 1300

Nt crate rests on the
floor. How much work
is required to move it
at constant speed (a)
4.0 m along the floor
against a friction force
of 230 Nt, and (b) 4.0
m vertically? ANSWER:

(a) The work against
friction is $Work = 230$
 $Nt \cdot 4.0 m = 920$
Joules $230 \cdot 4.0 = 920.$
