...

Undefined Experiment. Some errors in the chemistry lab result from an unclear definition or expectation of what the experiment is supposed to record. For instance, several chemists might get different answers when measuring a piece of rope or rubber band if they do not know what the tension is supposed to be. Instrument Limitations.

What Are Sources of Error in a Chemistry Lab?

Having drinks in the lab risks your experiment, too. You could spill a drink on your research or lab notebook. Eating and drinking in the lab is a form of distraction. If you are eating, you aren't concentrating on your work. If you're used to drinking liquids in the lab, you might accidentally reach for and drink the wrong liquid.
