aside time to catch up on reading. We have good news for you, digital bookworms — you can get in a good read without spending a dime. The internet is filled with free e-book resources so you can download new reads and old classics from the comfort of your iPad.

### **Osmosis Red Onion Cells**

Osmosis in Red Onion Cells. Background:Name

\_\_\_\_\_ All cells have a cell membrane which is described as being “Selectively Permeable” . This means that some materials can move easily in or out of the cell through the cell membrane as though it were a screen. When a substance passes through the membrane without any help from the cell, it’s most likely caused by diffusion.

This year I decided to use onion skin from a purple onion and we got awesome results! I used this lab BEFORE I taught any vocabulary such as osmosis, equilibrium, hypertonic, hypotonic, or isotonic. I wanted students to visually see what happens to cells in fresh water vs. salt water before I threw any vocabulary at them.
