It probably did not contain oxygen.1,300,000 Earths can fit in the sun and 109 Earths can go around the perimeter of the sun.The Earth's mass is 5,972,190,000,000,000 billion kg. The earth's mass is 5,972,190,000,000,000 billion kg. The radius of the earth is 3,959 miles and the diameter is 12,756.3 km.

The Earth - The Sun, Moon, and the Earth Facts

The Earth's path around the Sun is called its orbit. It takes the Earth one year, or 365 1/4 days, to completely orbit the Sun. As the Earth orbits the Sun, the Moon orbits the Earth. The Moon's orbit lasts 27 1/2 days, but because the Earth keeps moving, it takes the Moon two extra days, 29 1/2, to come back to the same place in our sky.

The word is often used in reference to the Sun, Earth, and either the Moon or a planet, where the latter is in conjunction or opposition. Solar and lunar eclipses occur at times of syzygy, as do transits and occultations. The term is often applied when the Sun and Moon are in conjunction (new moon) or opposition (full moon).

Earth, Sun, and Moon Jeopardy

Generally, though, we favor only capitalizing “earth,” “sun,” and “moon” when you are both: Referring to the Earth, its Moon or its Sun (not other moons or suns). Using “Earth,” “Sun,” or “Moon” with other capitalized celestial objects, such as planet names, and/or when “Earth” isn’t preceded by “the.”

How to Capitalize the Earth, Sun, and Moon (Plus Other ...

If Earth and Sun and Moon isn't Midnight Oil's best effort, it's certainly close. The band still sticks to themes that are close to its heart -- the environment, native peoples, and other social causes -- but rarely has it managed to fashion an album full of songs that are as musically intoxicating as on this 1993 release.
